

stem
sense

Stem Sense is a youthful rejuvenating formula that stimulates growth factors that activate stem cells in your body to replace worn out cells, while increasing mental and physical energy. Stem Sense delivers potent anti-inflammatory support compounds to help relieve joint and muscle soreness due to aging or exercise.

SUPPLEMENT FACTS

Serving Size: 2 Vegetarian Capsules
Servings Per Container: 30

Proprietary Blend

Freeze Dried Egg Powder, Hydroxytyrosol Powder, Schisandra Chinensis Ext, Boswellia Serrata Ext, Dead Sea Salt, Brewer's Yeast, Fucoidan, Cellulose (from capsule), Microcrystalline Cellulose, and Manganese Vegetable Stearate

** Daily Value Not Established

What's in it?

Beta Glucan

Beta Glucan is a potent immune system stimulator that primes the immune system to fight off foreign invading proteins. Beta Glucan also contains selenium, a micronutrient that supports healthy cell division.

Fucoidan

A potent stem cell activator and mobilizer to get stem cells moving and to keep them multiplying faster even after six months of exposing them to Fucoidan. It stimulates the growth of bone stem cells and helps redistribute them to increase calcium levels and bone strength.

Dead Sea Salt Minerals

A superior source of all essential minerals, including magnesium, calcium and potassium. Dead Sea Salt contains 27% of various minerals compared to ordinary sea salt that only has 3% salts, of which 95% is sodium chloride. Dead Sea Salt delivers high amounts of silica to support healthy hair, skin and nails.

Hydroxytyrosol

Considered the world's most potent antioxidant found in extra virgin olive oil. It stimulates the cells in the body to produce a special antioxidant - Manganese S.O.D., found only in the cells' mitochondria that generate energy. It is better to make the cells produce their own antioxidant enzymes than it is to give external antioxidants, such as vitamin C and E. Manganese S.O.D. is 3,500 times more powerful than vitamin C as an antioxidant.

Directions: Adults take 2 capsules in the AM with food as a recommended dietary supplement. Store in a cool, dry place.

Zygote-Derived Growth Factors

A natural blend of amino acids, oligopeptides and glycopeptides extracted in a cold process from fertilized bird eggs; harvested at the pre-embryonic stage of the egg when these nutrients are at their peak levels. Birds have exactly the same telomerase enzyme as humans do. The telomerase enzyme keeps our cells youthful and healthy by increasing the length of the protective end-caps on each of our twenty-three chromosomes. The length of these end-caps are maintained and restored to more youthful levels by increasing the amount of telomerase in our cells. The Zygote-Derived Growth Factors in Stem Sense supplies our body with growth factors to activate the telomerase enzyme so the DNA in our cells are protected.

Nerve Growth Factor

Nerve Growth Factor is a special type of Growth Factor that stimulates brain stem cells. It helps re-grow Neurites. Neurites are specialized cells that act as the telegraph system in our brain to allow cell-to-cell communication. Neurites die off during the aging process and this loss of cell communication is worse than ordinary brain cell loss. Stem Sense activates nerve growth factor which provides healthier brain cell communication by re-growing Neurites.

Schisandra Chinensis Extract

A plant that grows in the Ural Mountains in Russia that has been used as an energy source by hunters and hikers. Schisandra produces bright red berries that are edible and are said to reduce hunger, thirst and exhaustion on long trips. Schisandra is plant adaptogen that exerts an effect on the central nervous, sympathetic, endocrine, immune, respiratory and cardiovascular systems. Human studies show that Schisandra supports an increase in physical work capacity, helps improve memory and sharpness of thinking. Stem Sense contains a potent dose of Schisandra for increased mental and physical energy.

Boswellia Serrata Extract

A tree gum resin used in Ayurvedic Indian medicine to treat inflammation. Boswellia is a potent antioxidant. Studies with Boswellia serrata extracts show that it supports healthy joint comfort, function and mobility. Stem Sense contains both water-soluble and fat-soluble actives of Boswellia to deliver an immediate release and then a slower time release of nutrients for maximum anti-inflammatory support. Boswellia helps protect against collagen degradation, an important component of connective tissues.
